I am Julia Eickmeier. I im located at Alton Mental Health Center. I am being abused by all the workers here that are in on killing me. They have been paid off to kill me. They are a hired hit-man service to me. That's all.

I have a case going on in LaSalle County. It has been going on for sometime now. They have attempted to kill me after they got caught having sex with my child, and they have not stopped raping her either.

I got arrested outside the Father's house on an order of protection violation. He isn't being good to her anymore and I was trying to see what was going on, if any, with some of the local residents near his property but I was unaware I was within the 500 ft. proximity allowed on the O.P.. This girl was saying she had seen the police frequent the Father's place about every 15-30 minutes or so and the traffic was heaviest during the summer time when school wasn't a present factor for the child. She was telling me this offended her because she knew it was a dead end zone. They were accessing the Father's house from. He lives down a dead end drive consisting of him and his family's property's, so they were always going to his house quite frequently for some reason or another.

The child appeared to be abused from head to toe on several occassions when she was with me and I was providing care for her on a regular basis. She showed these signs after being with the Father. He is a piece of shit, he truly is. Any Parent who would let someone beautifully pimp out their own child should be arrested with handcuffs on their wrists and sitting in a prison cell. This makes me so angry that I have been conspired against when I was the only one trying to protect her from harm by the Father's abuse.

She went without a Guardian ad-litem for a long time in the "J" case. She should have had one from the very beginning. This would have altogether avoided atrocities onset by the lack thereof. She needs her mom in her life.

There are no abuse signs she displays when she is in my regular care and without the visitation with the Father. He shows no respect for her wellness.

The Father needs a psychological evaluation for pedophilia. He struggles tremendously by this and he attempts to pimp my child out to local authorities. His mother says he also has genetic forms of schizophrenia, which cause brain degeneration which is why my child is not safe from him at all. Please do your duty honorably and admirably and help protect my child from sexual abuse.

Sincerely,
Julia Eickmeier
